

WILLIAM PEARSON: Our illustrious Headboy. Exuberant and verbose, Tony P is 2nd-VI Arts comedian. His verbosity is exemplified at St.G.C. Manning Cup matches. Our Headboy slips from moments of gaiety to moments of seriousness and we witness this in his capacity as Chairman of Student Council. Does all his schoolwork at home, none at school ... good exam student. Delights in advertising D & G. Plans to marry a millionaire's daughter. **Future:** Law or Business Administration. Student Council, Domino Club, Lance Editor.

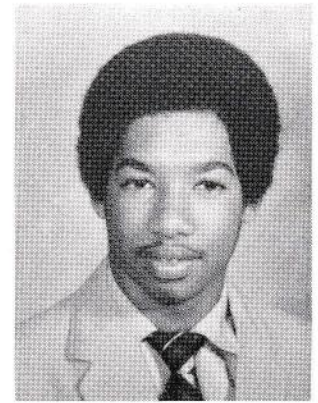

POST GRADUATES

GEORGE A. AARONS: Tony is the cool, dignified intellectual and the witty, sophisticated socialite his friends know and love. He possesses a natural flair for planning and clear, purposeful leadership. This, together with his mature approach and a mind unrivalled in ability, has earned him recognition as the most brilliant student in his form. His vast popularity is just another facet of a dynamic, well-rounded personality. Tony's future remains in archaeology. Assistant Head boy, Student Council (Vice-President), Science Club, School's Challenge Team.

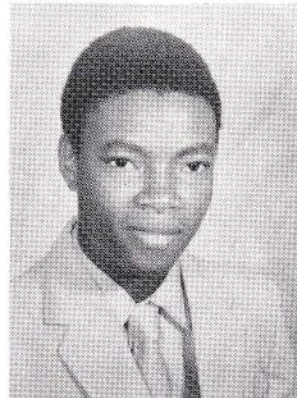

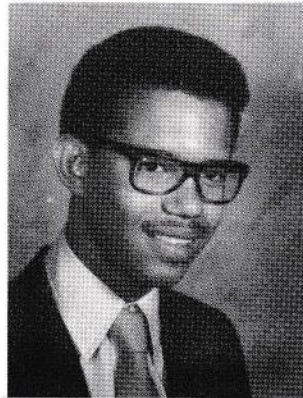

GLEN ARCHER: More often than not he is the only person in the minority. Profound Christian who changes his mind about nothing. Dedicated, successful student. Wants to study sociology (he just loves people), and dedicate his singing and dramatic abilities to 'the Master's use'. Prefect.

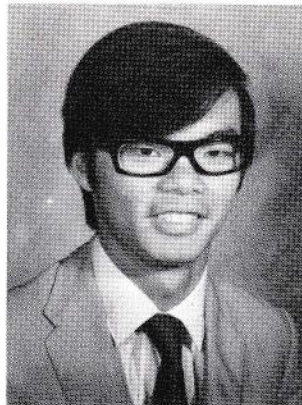

HUGH BARNED: Irvin, as he is sometimes called, has developed into a student of wide-ranging ability. Truly a gifted zoologist, he will be a very good doctor someday. Already is, according to latest reports. Self-confident, self-knowing open. **Activities:** Mendel Society, Science Club.

PATRICK BROOKS: Once upon a time Patrick was a nice quiet little boy, but now! Conservative and serious young man who speaks patois like English. Hopes to understand the bodies of other things as he understands the bodies of cars. Intends to do Law or Business. Chess, Drama, Debating, Lance Staff, Prefect.

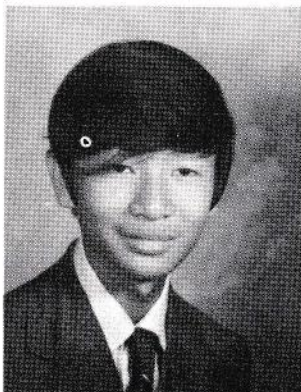

DUDLEY BROWN: The smallest man in 6th Form. His size however is no sign of his ability in school. A quiet little fellow, Dudso takes part in every joke and enjoys his daily game of box football. Willing to help out whenever he can. Future in Teaching, Law or Economics.

PAUL CHANG: Pablo. Brilliant mathematician-scientist whose chief talents lie in Chemistry, but his abilities stretch far beyond the field of academics, for he is well known as a true lady's gentleman. A ready smile and an amiable personality are two more of this young man's attributes. With a little luck, he will undoubtedly achieve the peaks of success. Future in engineering. Science Club, Table Tennis.

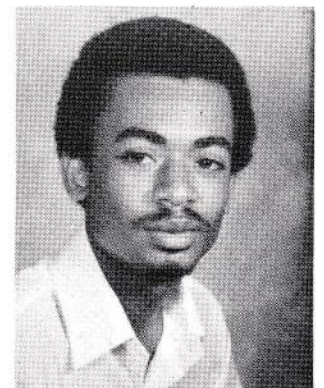

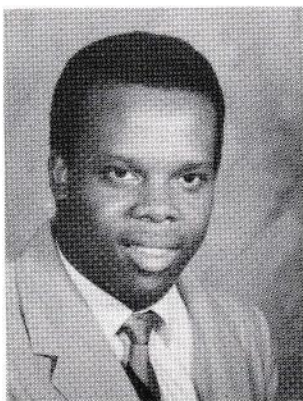

GORDON CHIN: Known to one and all as 'Bull Chin,' this friendly student has so often shown an exceptional talent for football, that he was elected Captain of the Manning Team. A very outspoken student, Gordon excels in Zoology and is a competent prefect. Extrovert, unselfish, easy-going. **Activities:** Manning Team, Prefect, Mendel Society.

TERRENCE CHUNG: has a somewhat reserved, sophisticated demeanour. Tries to hide a clever and adroit mind but never quite succeeds. As able on the table tennis board as he is at the sciences and maths. His silence is no indication of his wisdom, for his words, though few, are ever of inestimable value. Terry's friendship is truly a gift to cherish. Future in engineering. Table Tennis, Chess Club.

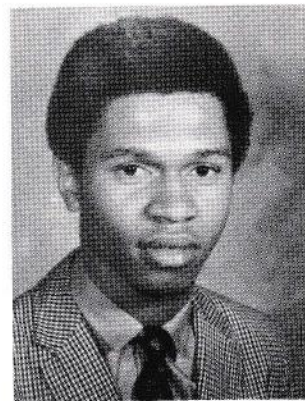

CARLTON CLARKE: Boy, this one! Favourite phrase — "Imperialist Dogs!!" Assiduous in history and tries hard at the rest of his subjects. The devil's gift to women. No one can convince him that he's not Jamaica's Lawn Tennis Champion. Wants to do Advertising after leaving school. Table & Lawn, Tennis Captain.

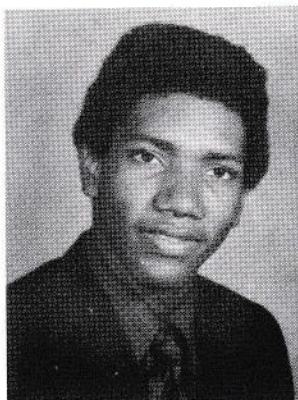

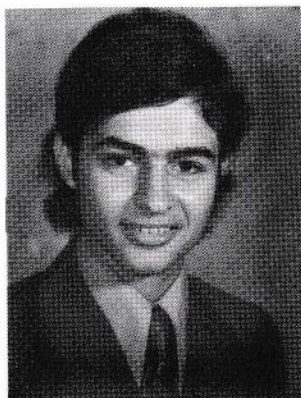

STEWART DALEY: "Stewy" is filled with convictions — which explains his size. Pro-found exponent of com-mittment. Goes through life learning the "ins" and "outs" of love so that in future he'll have a perfect wife. The idol of St. Hugh's and X.L.C.R. girls. Enjoys a cool, cool school life but when end of term comes, he's brilliant. He'll be in U.W.I. studying Economics next year. Prefect.

MICHAEL DIXON: The cliché "empty barrels make the most noise" is never more aptly used than when applied to "Dicko". His silence is really golden. A good mathematician and scientist, his sense of humour is remarkable for depth and pertinence. Sincerity and honesty, and diligence and success are as harmonious in him as bread and butter. His presence will certainly be missed when comes the parting of ways. Future engineer. Football.

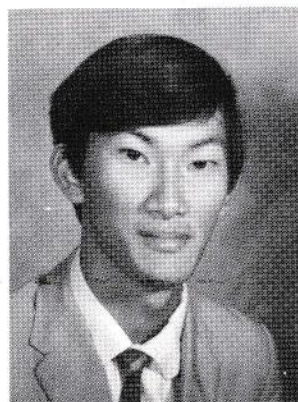

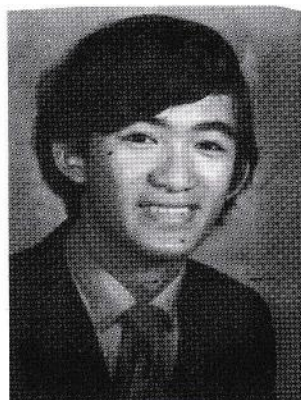

HANY EL SHARAWY: "The Sheik of Arabee". Hany is Egyptian by birth and a believer in Islam. Many a rewarding half hour has been spent in his company for tales of a culture very different from ours. He has added that little bit more sunshine to our tropic days. His English is impeccable. As a mathematician he has often put the foremost of us to shame. Future Mechanical Engineer. Table Tennis, Swimming.

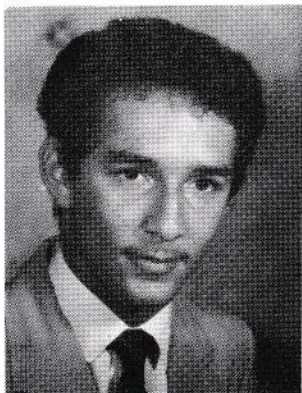

PAUL HASTINGS: Paul has shown such outstanding qualities, that after only a year at St.G.C., he became a prefect. He has a passion for cars, and is exceptionally well-informed on the subject. A Calabar emigrant, he has enriched the school with his presence. Just, Cosmopolitan, trustworthy. **Activities:** Prefect, Mendel Society, Science Club.

IRVIN HOOFAT: The 'Sampson' of Second Year Sixth. Irvin is a talented student, and his studious nature will take him wherever he wants to go in life. Not adverse to lending a hand when he can. Lover of life. Patient, modest, warm-hearted. **Activities:** President of the Mendel Society.

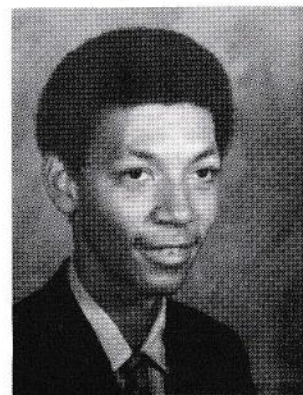

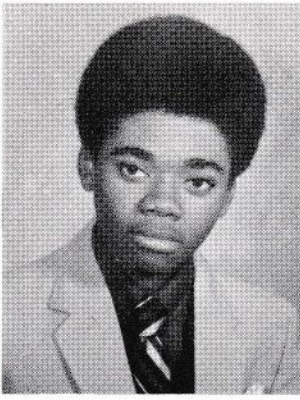

ROBERT KONG: A real brain, Robert's presence has really advanced 2nd year's reputation as a golden year. Gifted mathematically and scientifically, his academic record speaks for itself. He is well known for his generosity, his conduct and his manliness. A great organizer and conversationalist. One of those who have made second year as enjoyable as it has been. Future: Chemical Engineering. Prefect, Chess Club, Football.

RICHARD LAKE: Affectionately termed "Lago", this clever, amiable young man is one of the most popular of a popular class. Gifted with a keen, analytical mind, he will undoubtedly be one of the first of us to make a million. A born organizer, this truly genuine performer is headed for the post of Managing Director. Prefect, Student Council, Science Club President, Xavier House Captain, Chess, Dominoes.

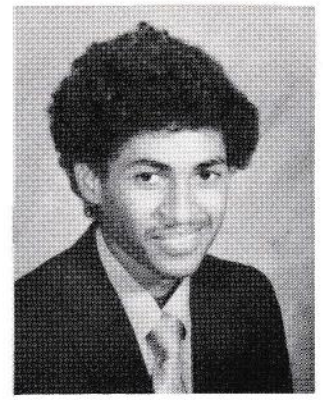

WINSTON LATIBEAUDIERE: Shy, unassuming gentleman who digs into his work with cool determination. Laughs at a good joke. Captain of the Milk box football team. "Lati" is a good friend and as such will get on in life. Future in the University Hospital or school?

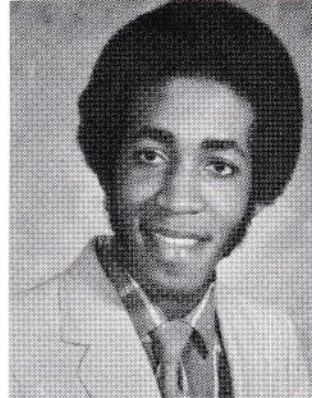

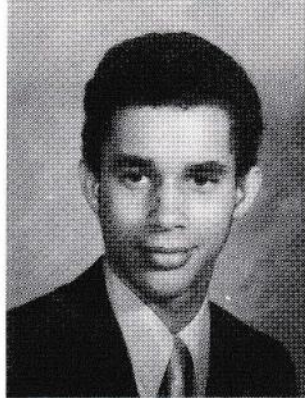

IAN LOBBAN: Ian is a guy who'll sit down to his work and get it done. His efforts are usually rewarded. His biggest aim in life is to sing like Engelbert Humperdinck one day. He's shy and reserved in public. Wants to teach or do Law or Public Relations. Drama, Debating, Lance Staff.

DEREK MATTHEWS: Derek makes differential calculus and dynamics look like the alphabet, and his performances in Physics and Chemistry are almost equal to this. Perhaps his assets are his unbelievable readiness to help anyone in need and his sensitivity for the rights, feelings, and ideas of others. His reliable calm and tact have solved many an "impasse". His future lies in engineering. Science Club.

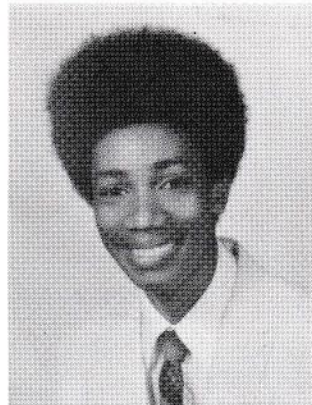

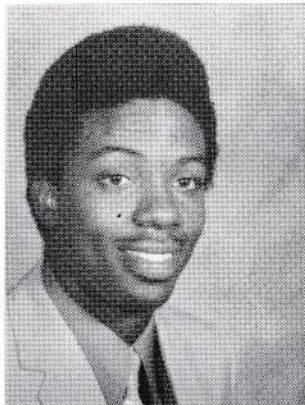

RICHARD McLAUGHLIN: Macko is equally proficient in the arts and the sciences. As a result, his future is undecided. Famed also for his wit, he often sends teachers and students into stitches. His ideas demonstrate an incredible depth of character for one so young. An unforgettable person. Science Club Treasurer, Student Council, School's Challenge Team, Debating.

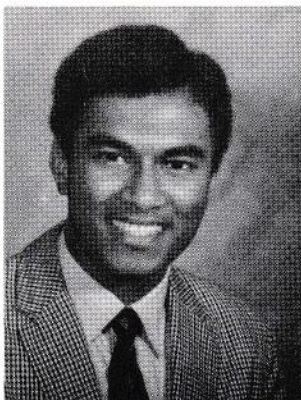

HENRY MORGAN: Henry can usually be seen flitting about the campus, filled with enthusiasm. A good student, he also has a great talent for drama; and one sees this both on and off stage. One of the two of that famous singing group 'The Two Engles'. Imaginative effervescent, sensitive. **Activities:** Drama, Mendel Society, Science Club.

AUBREY PENNANT: Strategist on gang warfare. A master of all sports (talking 'bout them) Aubrey does his work and one wouldn't believe that he's doing it. Achieves some amount of success, in his work, as the amount he puts in. His "out of school" life lies in a cloud of mystery. Champion House Captain. **Future:** Computer Programming.

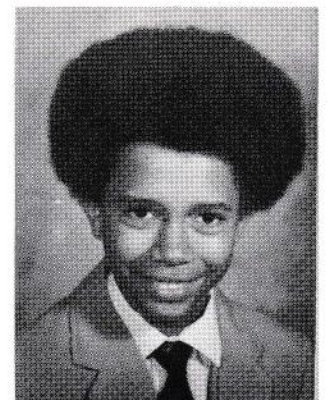

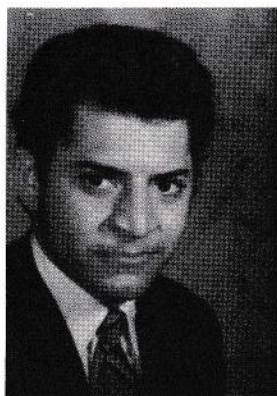

LLOYD RICHARDSON: J.I.S. TV personality, S.F.A. President. Able leader and gifted orator. Most people misunderstand him by thinking he's a 'conceited Romeo. Idol of hundreds of school girls. Creative. Pops into school whenever he feels like it. Very keen in history.

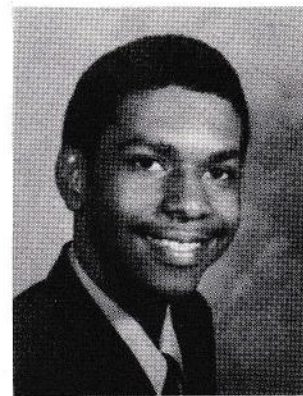

LOWELL SMITH: A superlative student. His brilliance in academics is equalled only to that of his subtle charming of girls. As a young man, Lowell understands the intricacies of law and politics. Girls find his stately and distinguished mannerisms quite attractive. Has developed over the years a thoroughly British accent and thus finds it "painful" to speak patois. A future lawyer. Prefect, Secretary Student Council, Lance Editor in Chief.

CHRISTOPHER TERRELONGE: Terry does Maths., Physics, and Chemistry with the greatest ease. He may not surpass many of us in height, but his stout heart makes him seem almost ten feet tall, for his benevolence and sincerity know no bounds. An imp at heart, he is skilled at the art of avoiding offence while provoking humour. His future is in engineering. Science Club, Table Tennis, Cricket, Chess.

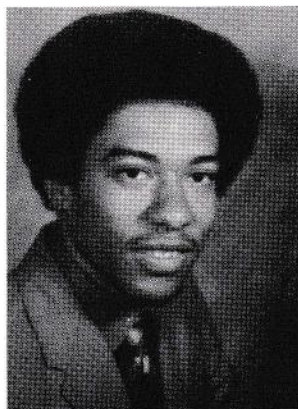

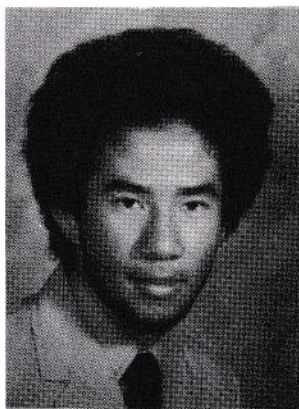

KURT TIBBETTS: Jamaica's answer to Tom Jones. He does his school work when he's not thinking 'bout his girl friend. A giant on the football field and, of course, Jamaica's answer to Pele. On the serious side, Kurt is a profound humanist, a good friend and a dedicated person. Shall do Maths and Economics at U.W.I. Lance Sports Editor, Track, Sunlight.

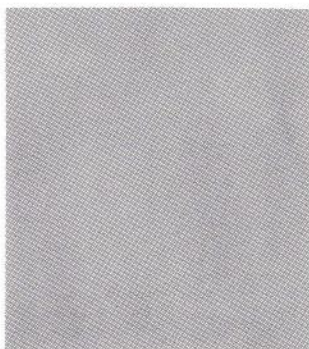

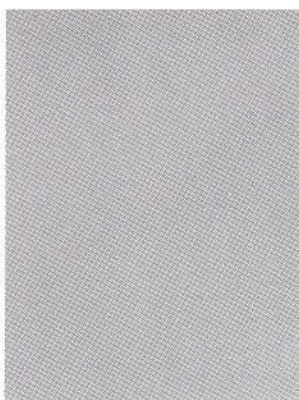

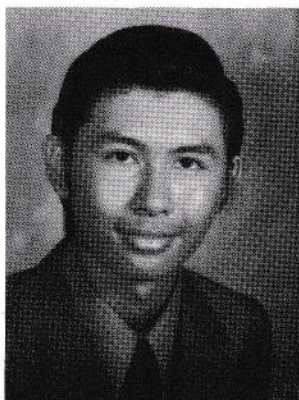

ST. HOPE THOMAS: This scholarly, dignified, young man can always be found helping someone. For this purpose, he has been blessed with a wealth of talents. A truly excellent student, St. Hope is an avid zoologist, and has his heart set on becoming a doctor. Impressionable, intense, sanguine. **Activities:** Mendel Society, Drama, Prefect, Lance Staff.

BASIL TOYLOY: Best mathematician-scientist-playboy the class has produced, Basil's popularity and engaging personality are by no means confined to campus. He has been without doubt an asset to this year's Manning Team. Sincere and supremely modest. He possesses all the necessary qualities, and more, to get to the top. Future engineer. Science Club, Student Council, Loyola House Captain, Manning Team, Dominoes.

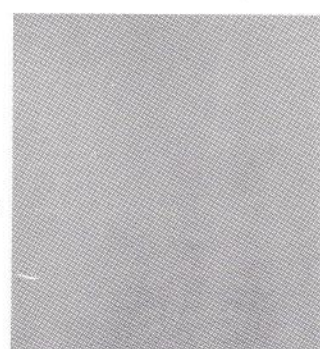

THEODORE TURTON: Teddy is a cool, calm and steady student. Although not especially dynamic, however, he usually succeeds in all his ventures. An ideal student, he does what he is supposed to do in class: pay attention! Zoology brains. Persevering, inquiring, loyal. **Activities:** Librarian of the Mendel Society.

CONRAD YEE: Conrad is forever combing his hair. A very likeable person, he can be brilliant whenever he wants to be. A friend to all he has a talent for setting people at ease, and a positive outlook on life. Aware, concerned, neat. **Activities:** Mendel Society, Science Club.

PESERVANCE

Who wins the race and gets the cheers?
It's the man who when the rest give up, continues, perseveres
L.C. McKenzie of ID

KILLERS

Killer of the Knights.
Gethsemeny alack.
Armour Glints
Blood precious is lost
Cracking Whip
Confusion of screams
The splash of water
The crunch of crushed flesh
The bang of hammer on wood,
Listen, vultures.
Hung in death
Pain in waves as blood falls.
Lepers cleansed
The blind see
Wash your hands in the blood of the Diety
Scrape of stones and heat of light
Scream.

'Praise the Lord, He has risen!'
The flesh rots but the soul lives.

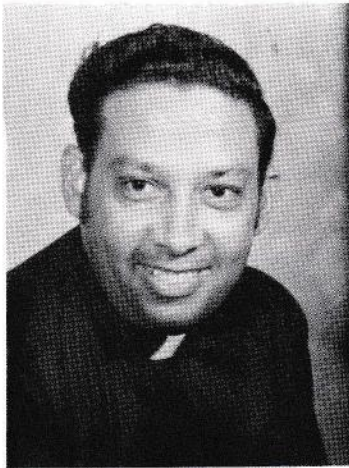

Unity is pugnity
Let us see our city
Walk proud sinners all
Forget not the torture
As we in deceit
Turn the fleet
Guided as sheep
Drowning in a cesspool of hate.
Learning is but chalk on a slate
Death is the beginning
Beware ...

Dream of the gentle stream
As you blithely enjoy the cream
Distaste you never know
Love is plastic
Man an image
Woman a streak of rose,
Listen, the cock crows.

Sun and the mist come
Man hardly heard
Silence, listen, silence
No one hears the tiger
He pounces
There is silence and unity.

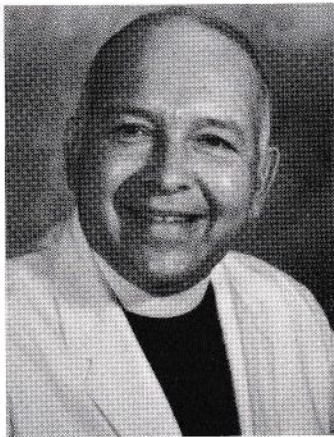

'Remember two years ago
When water found no flow?'
Well times come and go
'Listen, can you hear?'

Men as graves remembered
Only by tombstones
Leave invention and waste
While the world in its haste
Ceased to twirl mindlessly
Only a few to show
Listen, hear, understand, Believe.

AERIAL PHOTO OF
ST. GEORGE'S CAMPUS

An Isle of Plenty

It's a small island,
Rising out of a great sea,
A sea polluted till black,
There two round rocks be,
Why should he get all?
Am I less than he?

It's a steep mountain
Sharp and rugged like a crag,
Its beauty, they say, is unsurpassed.
But, to me, well, it just isn't my bag
It's magnificent and awe-inspiring
So what? Life is still a drag.

It's a bone.
Each one of those rocks is a pea
There are onions and 'scallions
And the black sea is the gravy
I am hungry but not alone
There are millions like me.

Dennis Lyn of 3A

The Body

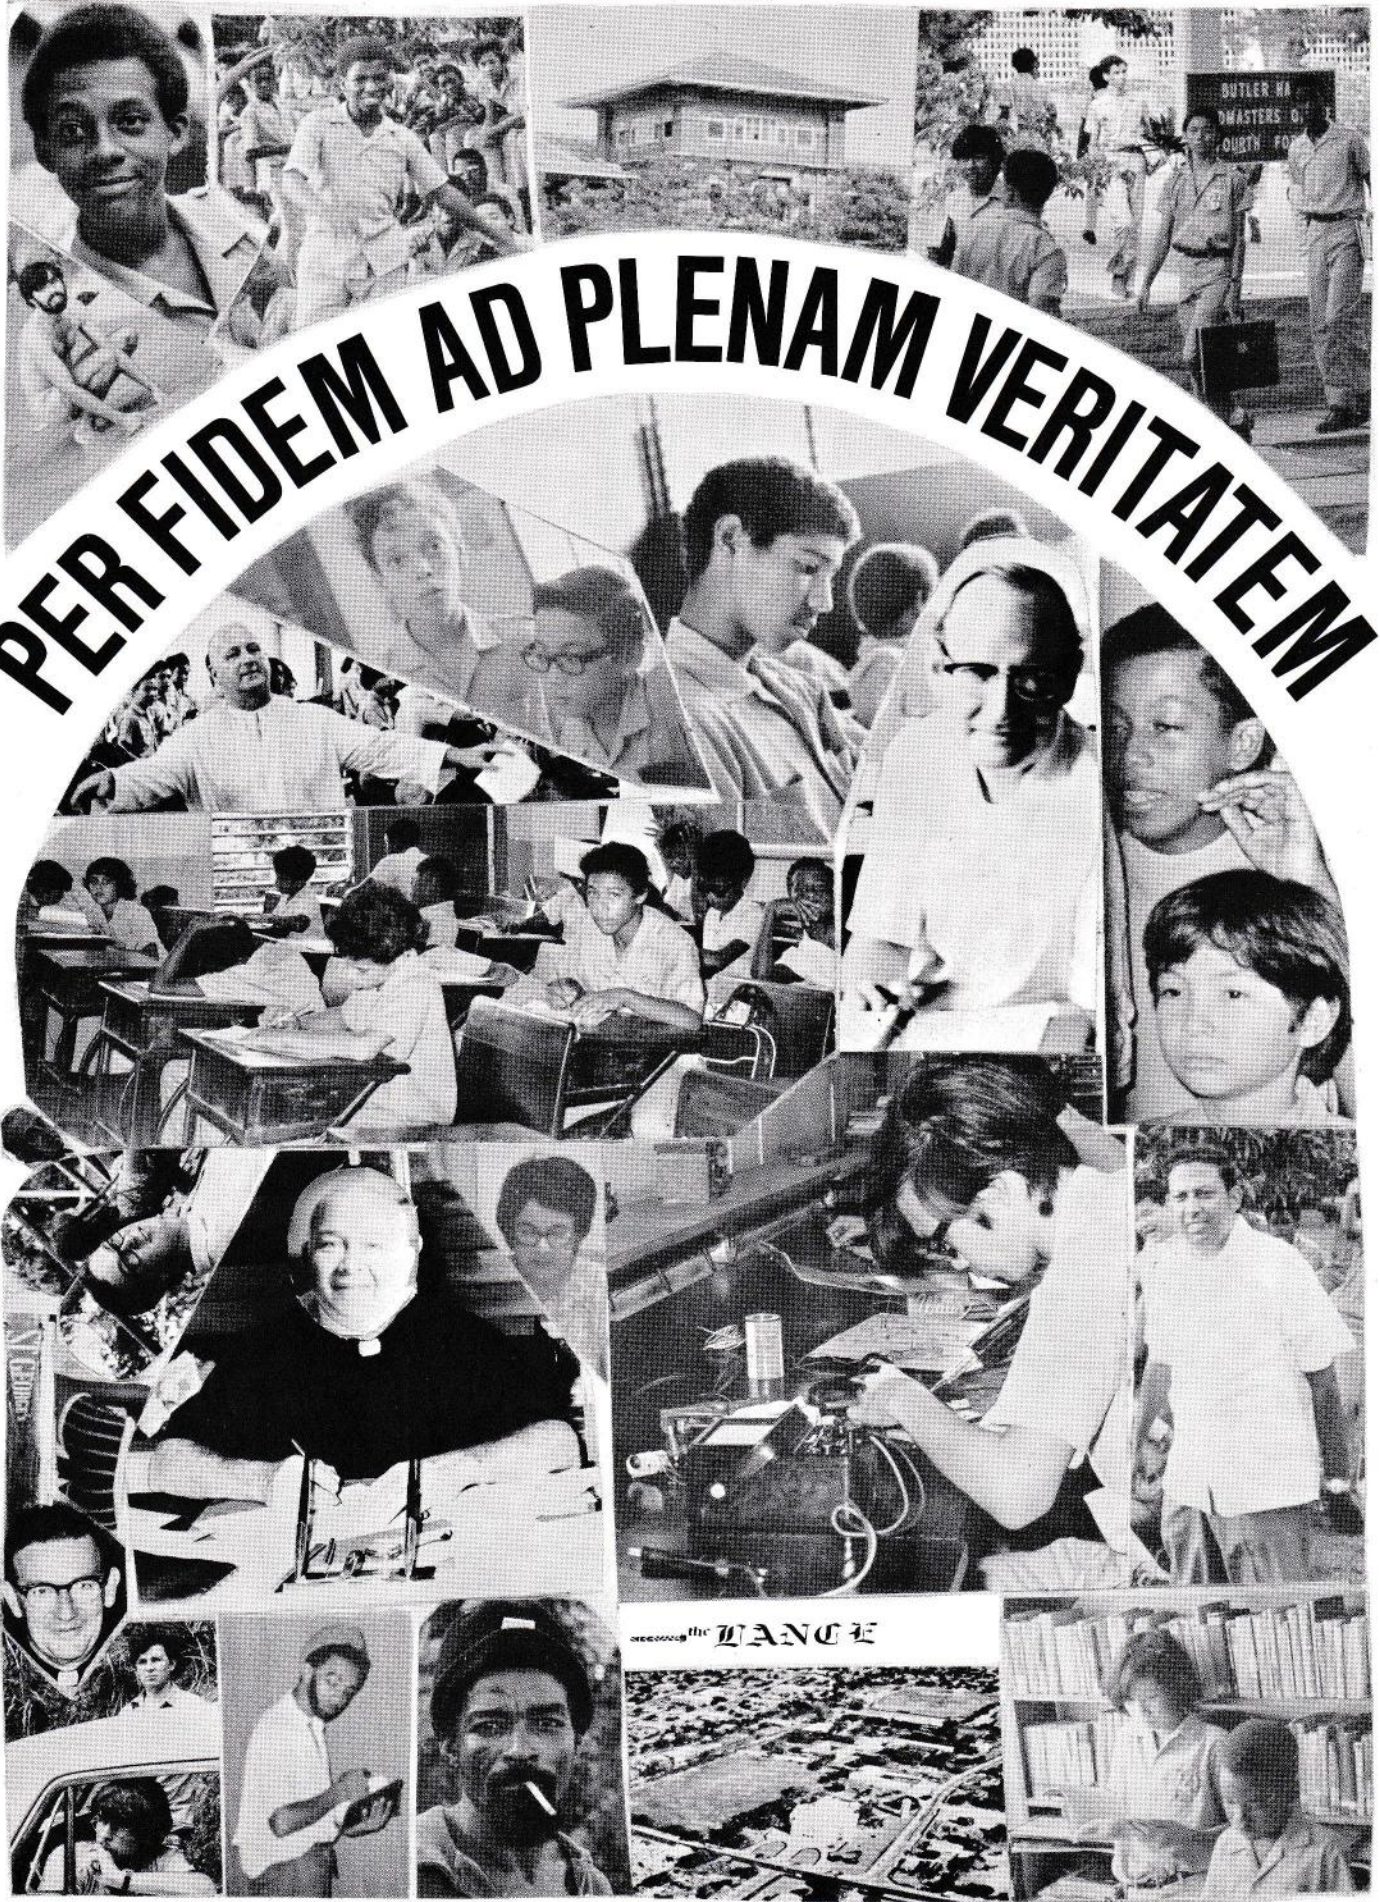

We all have a body
The most wonderful kind
A pleasant union
Of body and mind.

Each person is owner
And manager too
To direct his body
In what it should do.
To keep in condition
To work and to rest
To live and to die
And to properly function
In ways that are best.

Our mind is the thinker
To learn and to love
And to help us do all
We are capable of:
Our body is really
A wonderful gift.
To you, O God,
My body and mind I lift.

PLAYGROUND

The Lord of my dreams
Speaks in a
Tangled soliloquy
The outlooks of people's hearts
Are roiling, coiling water
Though true.

All things are concrete,
Except for ...
Nearly everything.
Paintings; frozen action.
How can we look at the sky?
Catsleek thoughts are few
Only in fiction
Can I speak correctly
In all the world
—Dancewave and Slithersnake —
The most magnificent chaos
Is loosed
Nearly everyone
Turns to brown sugar and melts
When wet
Like the wicked witch

How can the mumblin' world
Be bored . . . in this?
Watching those
Little units vary
An expression of happiness.

READ ON!

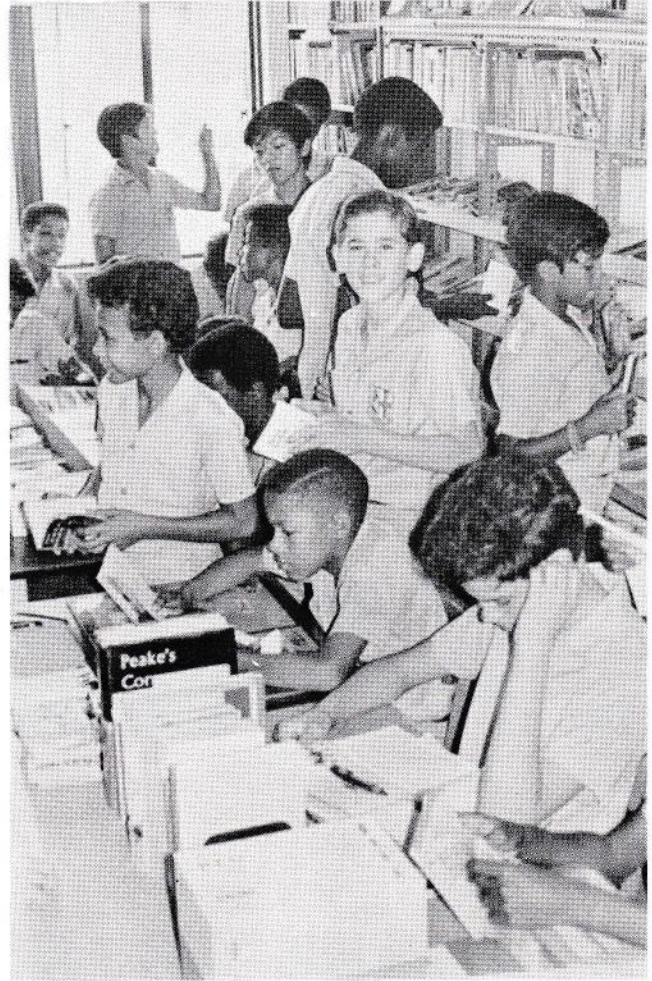

Like the Manning team, we are shooting for goals. Like the Sunlight team, we need practice in order to perform well. If we are to be truly educated men, if we are to be confident and fluent in our use of language, if we are to be fully human, we need to be well read.

Our Reading Centre is dedicated to the belief that learning extends far beyond the classroom. It is dedicated to the belief that learning is fun. We believe that learning is a multi-media experience. We have pictures, records, comics, magazines, THE LANCE, paperbacks and books.

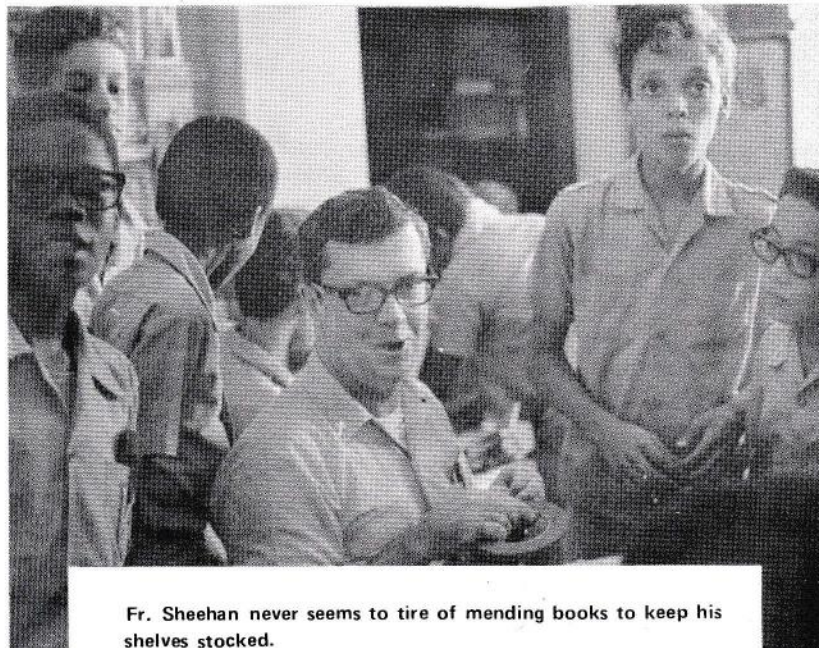

Our aim is to help you develop a genuine habit of reading; to develop critical taste in reading. Reading is thinking. It is one of your most important activities. Reading helps you to understand yourself and the world around you. It helps you to find meaning and beauty in life.

We believe that if you have a wide variety of interesting and inspiring reading experiences, you will be interesting and inspiring persons. You become what you read. Between the ages of eleven and sixteen, you become young men. You form important habits that shape and influence your life. It is good for you to form the habit of reading. This is why it is crucial to have many interesting, inspiring and attractive books available. This is why your Reading Centre exists.

As we realize our goals, the LIBRARY will be an even more vital part of our school, it will be a more attractive influence in your life. This is why a better library is part of our development plan. Read on, Brother Man, Read on!

Most students seem oblivious to the photographer. Books must be interesting.

Fr. Sheehan never seems to tire of mending books to keep his shelves stocked.
